

# Composites Engineer

Gentex Corporation, an internationally recognized leader in the design and manufacture of sophisticated military life support systems, has an immediate opening for a Composites Engineer.

The successful candidate will possess a B.S. in Mechanical and/or Materials Science with a minimum of four years composites experience. This hands-on position includes responsibility for and expertise in material characterization, testing, and optimization for specific applications, analytical and non-destructive test techniques, failure analysis and fracture mechanics as well as knowledge of the following reinforcement types; glass fibers, carbon fibers, aramid fibers, polymeric fibers, hybrids and resin systems. This individual must be able to research, develop and implement new or improved composite material processes as well as implement design to cost and or design for manufacturing techniques to composite design/development.

Selected applicant must meet eligibility requirements for access to classified information.

The ideal candidate must be familiar with CAD tools such as 3D Modeling and NASTRAN, as well as proficient in Microsoft Office software.

We offer a competitive salary and benefit package that includes 401(k), tuition reimbursement, paid vacation and holidays.

Gentex is an Equal Opportunity Employer M/F/V/D
